LPG & CNG EQUIPMENTS

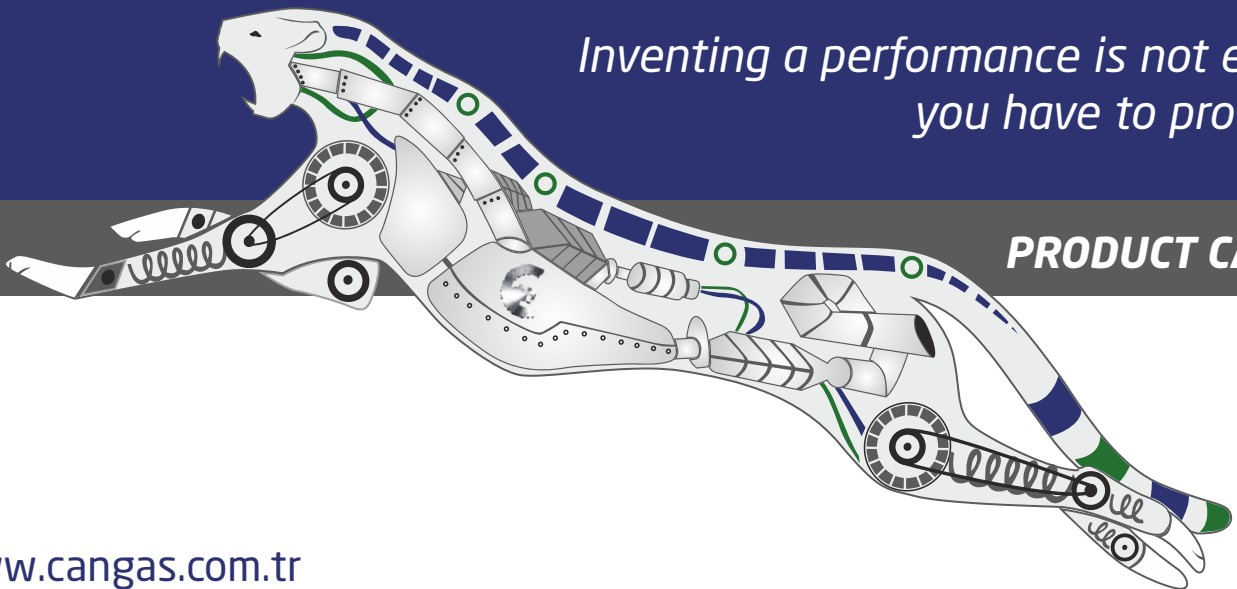

PETROL AND DIESEL LPG & CNG CONVERSION SYSTEMS

*Inventing a performance is not enough,
you have to produce it.*

PRODUCT CATALOG

www.cangas.com.tr

The first step of Cangas brand was in 2010 with 17 years experience of our founders' in the fuel conversion systems market.

Now, Cangas performs successfully in marketing, manufacturing, sales and after-sales services and is growing in domestic and foreign markets. Across Turkey, Cangas with its head office in Izmir, offers service with five regional distributors and more than 200 sales and service points.

Currently, we are exporting to 8 countries including Europe and expanding our range to different countries.

By the help of dynamic and young structure of the company, Cangas can make feasibility of the LPG and CNG systems and evaluate the future of the industry and can adapt to innovations. Cangas goes on R&D activities and invests in LPG and CNG conversion system industry, follows developments about using sources of alternative energy such as electricity and solar energy. Our R&D department is in collaboration with national and international universities which are experts in the related fields. It performs joint projects on the design, production, after-sales service of LPG & CNG conversion systems, and training of authorized dealers.

- Our production is made with high quality standards appropriate to ISO 9001, ISO 14001 and OHSAS 18001.*
- All parts are passed from control before assembling them. And after assembling, we make difficult tests to the end products before packing.*

Cylinder Tank

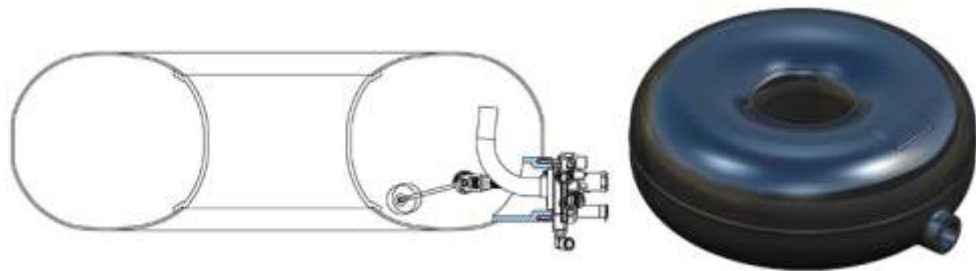

APPLICATION: It is composed of liquid gas, propane and buton gas. The powerful composition is used all type of commercial and transportation vehicles.

Internal Toroidal Tank

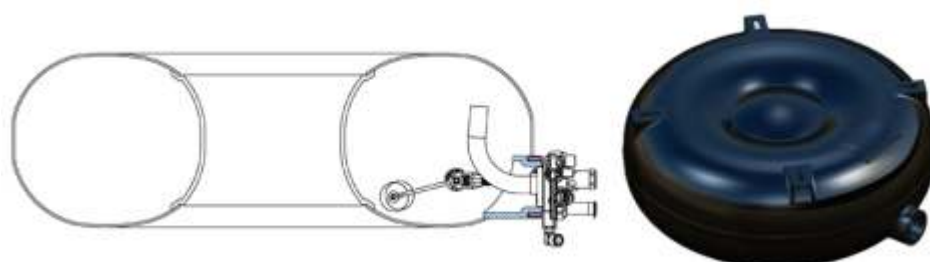

APPLICATION: It is composed of liquid gas, propane and buton gas. The powerful composition is used all type of commercial and transportation vehicles.

External Toroidal Tank

APPLICATION: It is composed of liquid gas, propane and buton gas. The powerful composition is used all type of commercial and transportation vehicles.

Ultra Toroidal Tank

APPLICATION: It is composed of liquid gas, propane and buton gas. The powerful composition is used all type of commercial and transportation vehicles.
